

Peter Lee

portfolio www.peterlee.tech

contact

peter.lee@berkeley.edu
(806) 789-5268

Skills

Languages

Java, Python, C/C++, Javascript, HTML, CSS, LaTeX

Frameworks

Meteor, MEAN stack, jQuery, Sass, Materialize, OpenCV, TensorFlow

Project Workflow

Gulp + Browsersync, NPM, Bower, Github, Heroku

Operating Systems

Linux, Windows

Design

Adobe Photoshop, Adobe Illustrator

Experience

Launchpad, www.callaunchpad.org

November 2016 – Present

Founder

- Founded an organization that is dedicated to empowering students at UC Berkeley to solve real-world problems with artificial intelligence, machine learning, and data science
- Developed the recruitment process and design for students to contact us through a pseudo-backend system on the website

Virtual Reality at Berkeley, vr.berkeley.edu

September 2016 – Present

Researcher

- Developed an open source augmented reality toolkit that enables human-computer interaction in 3D space on augmented reality platforms
- Integrated depth sensors, RGB cameras, and transparent display glasses on a wearable device that collects and displays physical data
- Implemented hand tracking and detection algorithms in OpenCV for depth sensors and RGB cameras

Projects

RecognitionCV, github.com/petr-lee/RecognitionCV

December 2016 – Current

OpenCV, C++

- Implemented a computer vision API that supports advanced hand tracking and face recognition through real-time video analysis
- Integrated object calibration and detection through median filtering, contour analysis, and point clustering

Stella, github.com/callaunchpad/Stella

December 2016 – Current

Javascript, jQuery

- Built an artificially intelligent chrome extension using speech recognition APIs to browse the web with voice commands

Hack In, www.hackin.io

June 2016 – July 2016

Meteor, Sass, jQuery

- Built a recruiting platform for tech companies to assess software development applicants through an integrated technical assessment
- Created an online platform hosted on Heroku with 5,000 lines of code in 3 weeks for the beta release

Frontend Boilerplate, www.peterlee.tech/FrontendBoilerplate

June 2016

Bootstrap, jQuery, Sass, Gulp + Browsersync

- Created a starter project for a highly customizable, modern frontend web project
- Compiled advanced frontend features including parallax, scroll animations, CSS preprocessing, and Sass mixin libraries

Computer Science Mentors, csmentors.berkeley.edu

August 2016

Materialize, Sass, jQuery

- Designed a modern website for Computer Science Mentors at UC Berkeley that is based on Google's material design principles
- Received over 2,000 views from undergraduate students and mentors at CSM

Awards

Hackerrank World Cup

September 2015

Semifinalist

- Qualified for the semifinals by solving competitive programming problems in C++ involving topics including data structures, graph theory, string processing, and computational geometry

Hack Into It

November 2015

Overall 3rd Place

- 24-hour hackathon hosted by Intuit seeking innovative methods of querying, organizing, and displaying large databases
- Built educational web application on tax implications of lifestyle changes

Activities

Innovative Design

September 2016 – Present

Gold Tier Member

- Facilitated workshops on graphic and web design that offer education and experience to intermediate designers
- Provided graphic design and web development services to on-campus organizations

Computer Science Mentors

August 2016 – Present

Mentor

- Taught a group of computer science students fundamental concepts of data structures, software development, and algorithms
- Created lesson plans and review sheets to improve general problem solving skills and prepare students for exams

University Symphony Orchestra

August 2015 – May 2016

Cellist

- Performed at sectionals, concerts, and rehearsals to practice classical symphonies by Tchaikovsky, Dvorak, and Mendelssohn as well as modern compositions by guest composers
