

# Peter Lee

portfolio [www.peterlee.tech](http://www.peterlee.tech)

**contact**  
[peter.lee@berkeley.edu](mailto:peter.lee@berkeley.edu)  
(806) 789-5268

## Skills

### Languages

Java, Python, C/C++, Javascript, HTML, CSS, Latex

### Frameworks

Meteor, MEAN stack, jQuery, Sass, Materialize, OpenCV

### Project Workflow

Gulp + Browsersync, NPM, Bower, Github, Heroku

### Operating Systems

Linux, Windows

### Design

Adobe Photoshop, Adobe Illustrator

## Education

### UC Berkeley

B.A. Computer Science and Applied Mathematics  
GPA: 4.0

### Relevant Coursework

CS61A – Structure and Interpretation of Computer Programs (A+)  
CS61B – Data Structures and Algorithms (A+, Ranked 3<sup>rd</sup> out of 1360)  
CS61C – Great Ideas in Computer Architecture  
CS70 – Discrete Math and Probability Theory  
CS170 – Efficient Algorithms and Intractable Problems  
Industrial Engineering 192 – Technology and Entrepreneurship  
Math 54 – Linear Algebra and Differential Equations  
Math 53 – Multivariate Calculus

Class of 2019

## Experience

### Launchpad, [www.callaunchpad.org](http://www.callaunchpad.org)

November 2016 – Present

#### Founder

- Founded an organization that is dedicated to empowering students at UC Berkeley to solve real-world problems with artificial intelligence, machine learning, and data science
- Developed the recruitment process and design for students to contact us through a pseudo-backend system on the website

### Virtual Reality at Berkeley, [vr.berkeley.edu](http://vr.berkeley.edu)

September 2016 – Present

#### Researcher

- Developed an open source augmented reality toolkit that enables human-computer interaction in 3D space on augmented reality platforms
- Integrated depth sensors, RGB cameras, and transparent display glasses on a wearable device that collects and displays physical data
- Implemented hand tracking and detection algorithms in OpenCV for depth sensors and RGB cameras

## Projects

### Hack In, [www.hackin.io](http://www.hackin.io)

June 2016

#### Meteor, Sass, jQuery

- Built a recruiting platform for tech companies to assess software development applicants through an integrated technical assessment
- Created an online platform hosted on Heroku with 5,000 lines of code in 3 weeks for the beta release

### Interactive Competitive Programming Notebook, [www.peterlee.tech/algorithms](http://www.peterlee.tech/algorithms)

December 2015 – Present

#### Materialize, Sass, jQuery, C++, Java

- Created an online interactive collection of famous algorithms in computer science as a reference for competitive programming contests

### Durd Chat, [durd.herokuapp.com](http://durd.herokuapp.com)

July 2015

#### Node.js, Express.js, Socket.io, jQuery

- Created a real-time chatting web application that matches users with similar statistics given by previous partners
- Implemented a server that facilitates real-time bidirectional event-based communication between clients with Socket.io

### Frontend Boilerplate, [www.peterlee.tech/FrontendBoilerplate](http://www.peterlee.tech/FrontendBoilerplate)

June 2016

#### Bootstrap, jQuery, Sass, Gulp + Browsersync

- Created a starter project for a highly customizable, modern frontend web project
- Compiled advanced frontend features including parallax, scroll animations, CSS preprocessing, and Sass mixin libraries

### Computer Science Mentors, [csmentors.berkeley.edu](http://csmentors.berkeley.edu)

August 2016

#### Materialize, Sass, jQuery

- Designed a modern website for Computer Science Mentors at UC Berkeley that is based on Google's material design principles
- Received over 2,000 views from undergraduate students and mentors at CSM

## Awards

### Hackerrank World Cup

September 2015

#### Semifinalist

- Qualified for the semifinals by solving competitive programming problems in C++ involving topics including data structures, graph theory, string processing, and computational geometry

### Hack Into It

September 2015

#### Overall 3<sup>rd</sup> Place

- 24-hour hackathon hosted by Intuit seeking innovative methods of querying, organizing, and displaying large databases
- Built educational web application on tax implications of lifestyle changes

## Activities

### Innovative Design

September 2016 – Present

#### Gold Tier Member

- Facilitated workshops on graphic and web design that offer education and experience to intermediate designers
- Provided graphic design and web development services to on-campus organizations

### Computer Science Mentors

August 2016 – Present

#### Mentor

- Taught a group of computer science students fundamental concepts of data structures, software development, and algorithms
- Created lesson plans and review sheets to improve general problem solving skills and prepare students for exams

### University Symphony Orchestra

August 2015 – May 2016

#### Cellist

- Performed at sectionals, concerts, and rehearsals to practice classical symphonies by Tchaikovsky, Dvorak, and Mendelssohn as well as modern compositions by guest composers
